

Amendments to the Claims:

The following is a complete list of claims, replacing all prior versions of the claims in the application:

- 1 (currently amended): A pest control system comprising a pest control active ingredient agent and isodiphenyl phosphate as a carrier for the active ingredient agent.
- 2 (original): A pest control system according to claim 1 which is a liquid.
- 3 (original): A pest control system according to claim 2 wherein the active agent is present in a high concentration.
- 4 (original): A pest control system according to claim 1 which is a solid.
- 5 (original): A pest control system according to claim 1 wherein the active agent causes paresthesia in warm blooded animals and the isodiphenyl phosphate is present in an amount effective to reduce the paresthesia of the active agent.
- 6 (original): A pest control system according to claim 5 which is a liquid.
- 7 (original): A pest control system according to claim 5 which is a solid.
- 8 (original): A pest control system according to claim 5 wherein the active agent is selected from the group consisting of pyrethrins and synthetic pyrethroids.
- 9 (original): A pest control system according to claim 5 wherein the amount of isodiphenyl phosphate is at least equal to the amount of active agent.
- 10 (original): A pest control system according to claim 9 wherein the active agent is selected from the group consisting of pyrethrins and synthetic pyrethroids.

11 (currently amended): A method for reducing the irritation to warm blooded animals of a pest control active agent in a solid or liquid formulation, the method comprising obtaining a solid or liquid formulation comprising a pest control active agent that is irritating to animals, and incorporating isodiphenyl phosphate into the formulation in an amount effective to reduce the irritation of the active agent.

12 (original): A method according to claim 11 wherein the amount of isodiphenyl phosphate is at least equal to the amount of active agent.

13 (original): A method according to claim 11 wherein the active agent is a solid.

14 (original): A method according to claim 11 wherein the active agent is a liquid.

15 (original): A method according to claim 11 wherein the active agent is present in a high concentration.

16 (original): A method according to claim 11 wherein the active agent is selected from the group consisting of pyrethrins and synthetic pyrethroids.

17 (original): A method according to claim 11 wherein the isodiphenyl phosphate is pre-blended with the active agent.
